**Foster Care Admissions - Children/Youth Admitted to Foster Care**

number and rate/1,000 children/youth ages 0-17 years (2018)

**Why This Matters:**
Children admitted to foster care are those children under age 18 years who enter placement outside their home as the result of a court order in a given calendar year. Responsibility for the care and custody of these children is transferred, by court order, from the child's parents to the Commissioner of the local Department of Social Services. Children and youth admitted to foster care provides the number of children admitted to foster care during a given calendar year and the rate per 1,000 children 0 through 17 years in the general population.

Many children entering the child welfare system have been exposed to developmental and health risk factors, including, poverty and substance abuse, and parental neglect and abuse (Halfon et al., 1995; Silver et al., 1999; Wulczyn et al., 1997; Wulczyn et al., 2005). Moreover, these risk factors tend to coexist and interact, presenting a complex family dynamic and a complicated set of service needs (Chipungu & Bent-Goodley, 2004).
