Child Abuse/Maltreatment - Indicated Reports of Child Abuse and Maltreatment
number and percent of reports (2019)

Why This Matters:
The State Central Register receives reports concerning alleged incidents of abuse and maltreatment in families and certain publicly licensed settings. A report becomes "indicated" when there is some credible evidence that a child has experienced abuse or maltreatment. This indicator presents the number of indicated reports in a given calendar year and the percentage of reports that are indicated in a given year.

The percentage is determined by dividing the total number of reports of child abuse or neglect received in the year in which at least one allegation was substantiated divided by the number of reports investigated. Reports can include more than one child and more than one type of abuse or maltreatment; therefore, this indicator is report-oriented, not child-oriented.
